

IMPORTANT TRUCK SAFETY MIRROR BULLETIN:

Sure Plus re-invents the safety spot mirror!

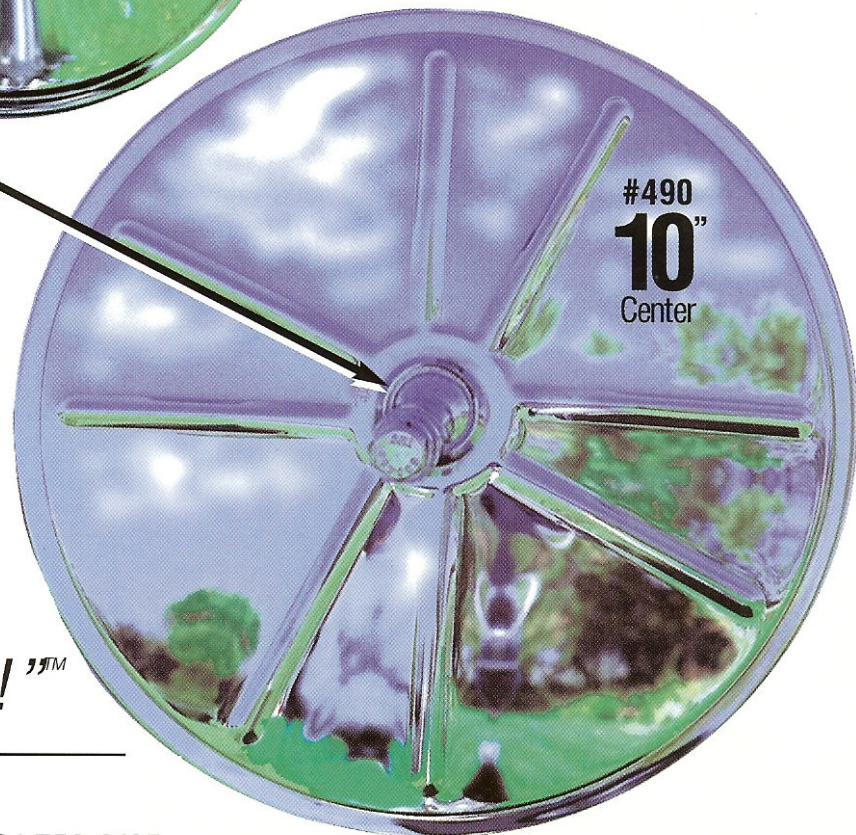

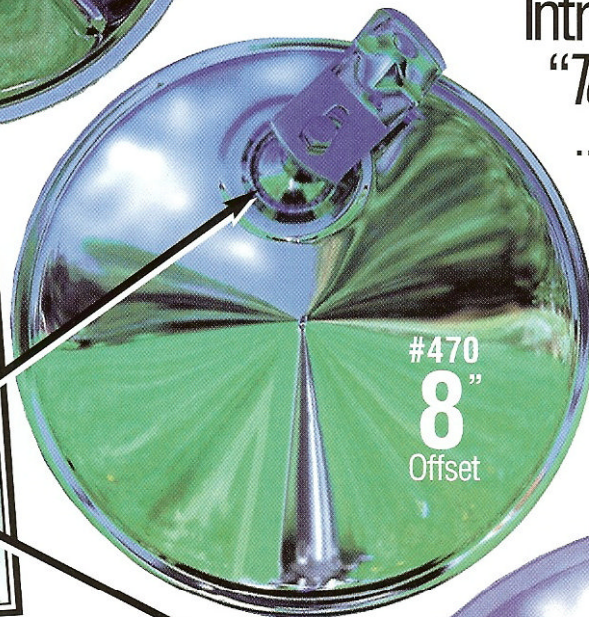

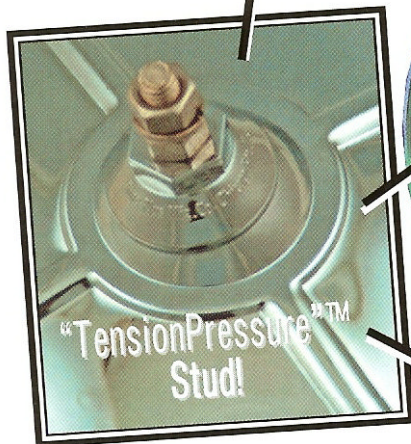

Fact: These highly respected safety spot mirrors are the *most widely used* truck mirrors in America!

Question: Why then, for heavens' sake, would **Sure Plus** want to "improve" them?

Answer: Because **Sure Plus** has found a way to make the next generation of these industry icons even more reliable and long-lasting than the mirrors which they replace. Not their crystal-clear convex mirror surfaces* which truckers have loved since their inception, but the *TensionPressure* stud attachment on the back! (***Sure Plus** convex mirrors are *still* the best!)

Introducing **Sure Plus'** NEW "*TensionPressure*"™ stud!

...never corrodes, never sticks, never needs tensioning adjustment, never gets loose & "floppy", *just stays where you've set it until YOU choose to reposition it!*

Next time you have to replace a spot mirror, ask for one with the NEW "*TensionPressure*" Stud from:
